

Dear Sir/Madam,

Please be advised that it is important to follow the instructions below to perform one or more of the indicated tests.

PREPARATORY DIET FOR COLLECTION

During the collection period do not consume chocolate, bananas, coffee, vanilla, citrus fruits.

PREPARATION FOR URINE COLLECTION

- o Use only special containers available from pharmacies.
- o Pick up the preservative from the sampling room to be placed in the container.
- o During collection, avoid exposing the container to light and temperatures above 10°C by storing it in a refrigerator.

Warnings

The preservative contains HCL 6N.

- o Do not leave the container within the reach of children.
 - o Do not breathe dust/fume/gas/mist/vapors/aerosols.
 - o In case of skin contact, remove any contaminated clothing and wash thoroughly with water.
 - o Store only in original packaging, as it can be corrosive to metals.
 - o In case of contact with the eyes, wash thoroughly with water, remove, if easy, any contact lenses, continue rinsing, and contact the nearest emergency room.
 - o Do not ingest. In case of accidental ingestion, contact the nearest emergency room.
- In case of access to the emergency room, bring this preparation with you and show it to the medical staff.

24-HOUR URINE COLLECTION

1. Place the preservative inside the collection container.
2. Discard the first morning urine.
3. Start collection at 7:00 a.m., collect all subsequent urine in the container including the following morning one (also at 7:00 a.m. at end of collection).

SAMPLE DELIVERY

The container with the collected urine must be delivered during the opening hours of the sampling room.
