

Dear Sir/Madam,

Please be advised that it is important to follow the instructions below to perform this test.

### PREPARATION FOR COLLECTION

- Use a special 24-hour urine collection container available at the pharmacy.
- Pick up the preservative from the Collection Center to be placed in the container.
- During collection, avoid exposing the container to light and temperatures above 10°C.

#### Warnings

The preservative contains Sodium Azide 15 g/L in NaOH 4N

- Do not leave the container within reach of children.
- Do not breathe dust/fume/gas/mist/vapors/aerosols.
- Wash your hands thoroughly after use.
- In case of skin contact, remove any contaminated clothing and wash thoroughly with water.
- In case of contact with the eyes, wash thoroughly with water, remove any contact lenses if it is easy to do so, continue rinsing and contact the nearest emergency room.
- Do not ingest. In case of accidental ingestion, contact the nearest emergency room.
- In case of access to the emergency room, bring this preparation with you and show it to the medical staff.
- Do not disperse into the environment.

### SAMPLE COLLECTION

1. Place the preservative inside the collection container.
2. Discard the first morning urine.
3. Start collection at 7:00 a.m., collect all subsequent urine in the container including the following morning one (also at 7:00 a.m. at end of collection).

### SAMPLE DELIVERY

The container with the collected urine must be delivered during the opening hours of the Sampling Room.
