

*Dear Sir/Madam,*

*Please be advised that it is important to follow the instructions below to perform this test.*

#### **PREPARATION FOR URINE SAMPLE COLLECTION**

- o Use the appropriate sterile container available from pharmacy.
- o Collect the first morning urine obtained after the night's rest.
- o The sample must be delivered on the day of collection.

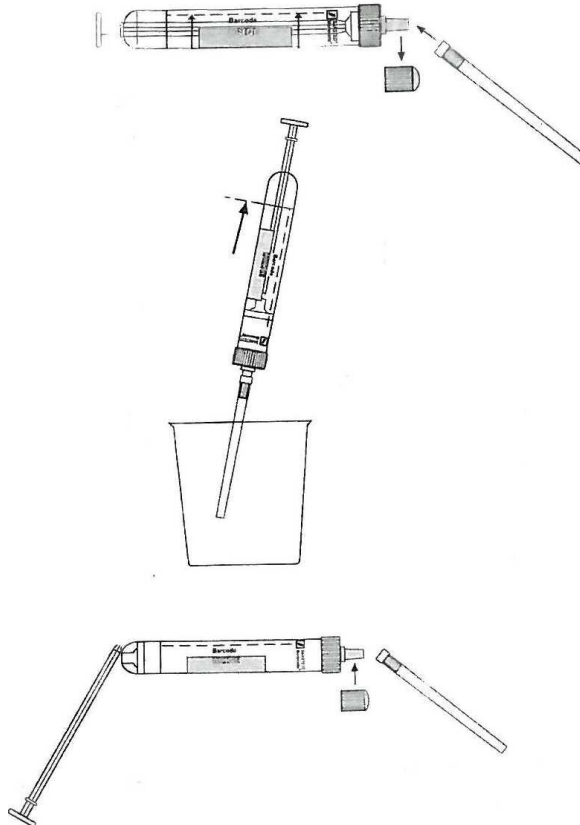

#### **SAMPLE COLLECTION**

- o Collect the urine directly into the container.

#### **SAMPLE DELIVERY**

The container should be kept refrigerated until it is delivered to the Collection Center during opening hours.

In case of using the dedicated yellow Monovette:

- o Insert the cannula into the container and aspirate with the piston of the Monovette until completely filled.
- o Detach the cannula, break the piston, and close the Monovette with the appropriate cap.
- o Discard the container with any excess sample and deliver the Monovette to the Collection Center during opening hours.
